

# SmartCellar

## Pairing Instructions

Download app from app. store or google play. Look for Smart Cellar.

- Press Icon, and wait approx. 20 seconds until
- Unknown device screen appears.
- Press on Unknown device
- New Device Screen appears
- Enter name of pub or premises and press Ok
- Fetching Data screen will appear.
- Then Bluetooth Pairing request will appear
- Press the Set button TWICE on the Smart cellar and a 6-digit code will appear on the screen.
- Type this into phone and press pair
- Phone is now paired to device

Immediately after pairing, press settings and enter Chiller Power and Electricity Cost (pence per kWh) into phone and press save.

Then go to top left and press Devices

Press e-mail set up and input the e-mail/s you want the savings reports sent to.
